About Us

We proudly support clients across Alberta, British Columbia, Saskatchewan, and Manitoba, providing dependable, high-quality service solutions that keep operations running smoothly and efficiently.

With more than 35 years of hands-on experience throughout Western Canada, we've established a strong reputation for exceptional turnaround times, advanced problem-solving capabilities, and meticulous attention to detail. Our technicians are highly skilled in servicing an extensive range of pump types and configurations, allowing us to meet the unique requirements of every customer, application, and industry we serve.

From routine maintenance and inspection programs to complete system overhauls, our Calgary Service Center is dedicated to being your trusted partner—delivering reliable, high-performance pump solutions you can count on.

Our Capabilities Include:

- Genuine OEM parts supply for reliable, long-term equipment performance
- On-site engineering support for technical challenges, diagnostics, and problem-solving
- Pump repair, maintenance, & complete overhaul services
- System upgrades, re-rates, & performance improvements
- Installation and commissioning of new or refurbished pump systems
- Custom-engineered pump packages tailored to customer requirements
- Dedicated customer support from start to finish
- 24/7 emergency service for critical breakdowns & urgent repairs
- Comprehensive guarantees & warranties for peace of mind
- On-site field service to reduce downtime & improve operational efficiency
- A strong commitment to quality, safety, & customer satisfaction

EXPERT TEAM & COMPREHENSIVE FIELD SOLUTIONS

Our team is composed of highly skilled professionals, including certified millwrights, experienced mechanics, and qualified field service technicians, all dedicated to delivering exceptional service and technical expertise.

We offer a comprehensive range of products and field services, including the supply of new pumps, complete pump overhauls and repairs, on-site field work for both repair and installation, as well as a full inventory of spare and replacement parts to ensure minimal downtime and maximum operational efficiency.

CASE STUDY: BB5 PUMP OVERHAUL

We successfully completed a full overhaul of a high-pressure BB5 multistage centrifugal pump used in oil & gas pipeline operations. The scope included reverse engineering, impeller replacement, and hydrostatic testing, with critical tolerances & material upgrades to meet API standards. Despite tight deadlines, our team delivered a fully refurbished unit that passed all quality checks, ensuring reliable performance for our client's operations.
