

# ESG Philosophy

Celeros Flow Technology is an integral lifecycle partner in serving the world's mission-critical flow control needs. Whatever the challenge – the discovery of new energy resources, making distribution more efficient, improving the intelligence from our customer's processes, boosting renewable energy generation, or reducing emissions from flow control processes – our total partnership approach helps to secure a more reliable and sustainable global operational footprint and supply chain.

Our ESG Policy formalizes Celeros Flow Technology's commitment to responsible business practices in the areas of:

- **Environmental Stewardship:** we aim to embed environmental stewardship in everything we do. We believe we have a responsibility to minimize the energy, carbon, water and waste impacts of our business.
- **Social Responsibility:** our commitment to operate in a socially sustainable manner, while recognizing the interests of our stakeholders. We must consider the impact the Company has on its employees, local communities and society
- **Governance, Ethics & Compliance:** we employ clear and effective governance practices to ensure that we live up to our ESG commitments and conduct business in only one way – the right way.

**Celeros FT Core Values:** The core values of Celeros FT reinforce our dedication to our customers, employees and the communities in which we operate.

**INTEGRITY – SPEED – ACCOUNTABILITY – PARTNERSHIP – EXCELLENCE**
